SAFES

VAULTS AND VAULT DOORS

CATALOGUE 2022

Chubbsafes

Trusted the world over.

Trusted the world over, Chubbsafes is the oldest brand for safes, vaults and vault doors in the world. Chubbsafes solutions are well known and appreciated for their unique combination of robustness, reliability and modern designs.

Having provided high-quality protection solutions for almost two centuries, Chubbsafes combines experience with innovation to create trustworthy products for maximum protection against burglary, fire and explosives.

The Chubbsafes solutions are rigorously tested by international and independent accreditation bodies to guarantee the best protection available.

MAKE SECURITY A VIRTUAL PART OF YOUR EVERYDAY LIFE

Try out the new AR functionality at www.chubbsafes.com and place a safe where you are standing right now!

All you need is a smartphone – no app needs to be installed. Visit www.chubbsafes.com, select a safe and take the first step towards making security a part of your everyday life.

WHICH SAFE IS RIGHT FOR YOU?

The most important initial question is what you want to protect – cash and valuables, documents or data media?

CASH AND VALUABLES

Choose from the burglary protection range. This includes safes, cabinets, vaults & vault doors, designed to withstand physical attacks in different strengths or Grades. Each Grade represents a particular “cash rating” which is the amount an insurer will cover.
The actual amount of cover can vary between insurance companies and country, and may be different to the manufacturer's recommended rating. You should always check what cover your insurance company is prepared to offer.

DOCUMENTS AND DATA MEDIA

Choose from the fire protection range which includes safes and filing cabinets designed to keep documents or data media safe from the effects of a fire.

DOCUMENTS

To survive a fire, documents require protection from temperatures higher than 170°C. Therefore cabinets have to be specifically designed, tested and then certified for this task. Without a credible certification, you cannot be sure that your documents are safe.

DATA MEDIA

The same is valid for data media, except here the cabinet must offer much greater protection due to the sensitivity of the material. If the inside of the cabinet exceeds a mere 50°C, then the information on a CD, DVD or tape will be destroyed.

CERTIFIED STRENGTH

To provide the appropriate level of protection, the products are tested to comply with the latest industry standards. The various certification tests carried out in independent laboratories for burglary or fire protection are conducted by experienced operators armed with plans of the product and a whole range of tools.

FOR BURGLARY PROTECTION, safes and vaults are awarded grades:

- For security cabinets, there are Grades S1 and S2 (EN 11450).
- For safes, vaults and vault doors, they are rated from Grade 0 to Grade XIII (EN 1143-1).
- High security locks are graded according to EN 1300.

During the certification process, door panels of the products, bolt works, locks and handles are tested. The certification tests include an attack program that is devised so that various break-in attempts can be made using a selection of tools. A correlation between tool type and the time for which each one is used can be used to obtain a resistance score (resistance unit). The higher the score, the higher the level of resistance. Based on the results obtained, the safe is given a classification and then listed in a resistance grade.

FOR FIRE PROTECTION, these standards vary according to whether you want to protect paper documents, digital media or other highly sensitive objects. This is because the temperature at which data media (e.g. 50°C) and documents (e.g. 170°C) deteriorate differs according to the item protected:

- In order to fully protect data media, industry standards indicate that products should carry ECB•S EN 1047-1, UL 72 Class 125 or NT Fire 017 60/120 DIS.

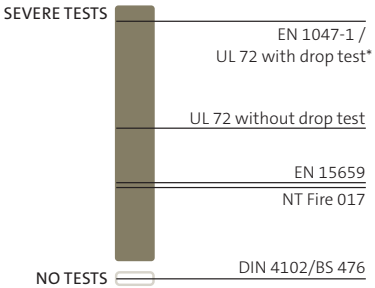
The ECB•S and UL tests monitor the internal temperature of the data cabinet until it has completely cooled down during the "soakout" period. Assessing products during this period is essential, since internal temperatures can peak up to six to eight hours after a fire has been extinguished. Such tests ensure that all products are comprehensively tested and, upon passing, will fully protect your data media for the specific time period stated.

- For document protection, all products must have an appropriate industry standard 30-, 60- or 120-minute paper certificate.

UL 72 Class 350, ECB•S EN 1047-1, EN 15659 or NT Fire 017 are acceptable standards for paper document protection.

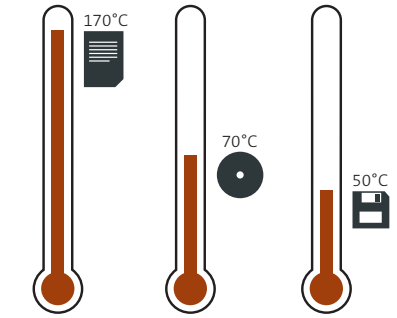
LEVELS OF RESISTANCE

Alongside extremely strict standards, you will also find a number of others that are less stringent in terms of resistance.



* Test UL 72 does not necessarily involve conducting a drop test.

HIGHEST ALLOWED INSIDE TEMPERATURE



STANDARD IN BRIEF

STANDARDS	TEMPERATURE TEST	DROP TEST	PAPER	DATA MEDIA	COOLING
EN 1047-1	1090°C	9.15 metres	S 60 P (60 min.) / S 120 P (120 min.)	S 60 DIS (60 min.) / S 120 DIS (120 min.)	incl. the cooling period
UL 72	1090°C	9.15 metres (In UL the drop test is optional so always check what is being claimed)	Class 350 (½, 1, 2 hours)	Class 125 (½, 1, 2 hours)	incl. the cooling period
EN 15659	850°C	no	LFS 30 P (30 min.) / LFS 60 P (60 min.)	no application	not tested
NT Fire 017	927°C	no	60 paper (60 min.) / 120 paper (120 min.)	60 diskettes (60 min.) / 120 diskette (120 min.)	not tested
DIN 4102/BS 476	not tested	not tested	not tested	not tested	not tested

EUROPEAN CERTIFICATION FOR SAFES, VAULTS AND VAULT DOORS EXPLAINED

In order to attest to the quality of a certified product, an information plate is adhered to the inside of the product. This provides you with guarantees that the product has been tested and manufactured in an environment that has been checked by the certifying body.
Below is shown the ECB•S label and the details listed on the information plate.

BURGLARY PROTECTION CERTIFICATION

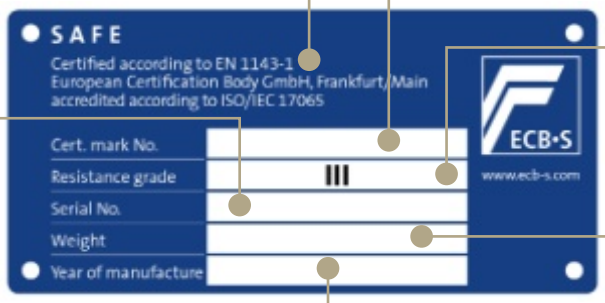
EN 1143-1/EN 14450
The European standard that the product meets

CERT. MARK. NO.
Certificate number issued by the certifying body

SERIAL NO.
Each product can be identified by a unique serial number. This number is given by the certifying body

RESISTANCE GRADE
Resistance classes

WEIGHT
The safe's net weight. A 5% tolerance in the net weight indicated is accepted



YEAR OF MANUFACTURE
The year that the product was manufactured

FIRE PROTECTION CERTIFICATION

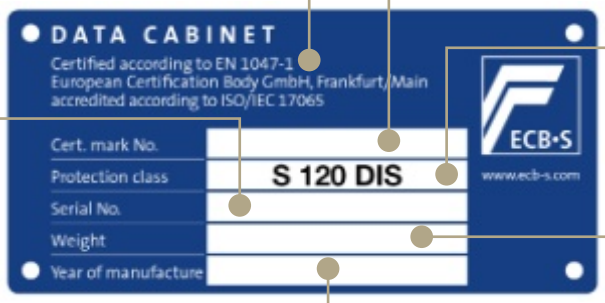
EN 1047-1/EN 15659
The European standard that the product meets

CERT. MARK. NO.
Certificate number issued by the certifying body

SERIAL NO.
Each product can be identified by a unique serial number. This number is given by the certifying body

PROTECTION CLASS
Resistance classes

WEIGHT
The safe's net weight. A 10% tolerance in the net weight indicated is accepted



YEAR OF MANUFACTURE
The year that the product was manufactured

Fire testing is undertaken by independent laboratories with certificates issued by certification authorities. Here are some examples of test institutes and certificates that you may encounter: ECB•S, UL, iBMB, MPA Dresden, Applus RTD, SP, VdS.

FOR MORE DETAILED INFORMATION, contact your insurance company or visit the chubbsafes.com website.

LOCKING OPTIONS

Depending on the range, you can customise your product with a different lock. Thus you can benefit from a comprehensive lock offering that includes the latest industry solutions, which offer a wide range of features. So whether it be the “mechanical combination” lock or an electronic solution, you can be sure to have a lock that will meet your security needs. Below the key terms associated with the range of locks.

DEFINITIONS

KEY LOCK: A manual key-operated lock.

MECHANICAL COMBINATION: A mechanical keyless dial lock with a changeable combination.

ELECTRONIC LOCK: An electronically-operated keypad lock with a changeable combination.

MANAGER MODE: Allows one user to control the functions of other combination holders.

NUMBER OF USERS: The number of users able to program in their own access code.

DURESS FEATURE: An alarm engineer can link the lock into a monitored alarm system. Then, using a given procedure, the lock can be operated, the safe opened and a silent signal given to the monitoring station that this is being done under duress.

TIME DELAY: This feature allows for a pre-set delay between operating the lock and being able to open the safe. The operation may vary between lock types.

TIME LOCK: Time lock allows the user to set periods during which the lock may be operated, e.g. during business hours only. The options available will vary between locks.

AUDIT TRAIL: The lock is able to give a report (it will vary in detail from model to model) of usage and may show times of operation, codes used and operations performed.

DUAL CONTROL: Allows two users to enter their details before any operation can be performed.

PLANNING, DELIVERY & INSTALLATION

Once you have selected a product, you can also chose the installation survey option. We will then agree with you on a flexible installation schedule. The flexibility of the installation process is evidence of Gunnebo’s commitment to ensuring the cost- and time-efficient completion of your purchase.

Our products are delivered and installed by trained Gunnebo installers. Whatever the delivery environment (e.g. large bank or small office), you can be assured that the installers will take the greatest care. We are also focused on making sure the service on offer is achievable to the highest standards of workmanship, and is promptly completed within the contracted timescales.

DUOFORCE

BURGLARY & FIRE-RESISTANT PROTECTION

EN 1143-1
Grade III

NT Fire 017
60 Paper

KEY FEATURES

- Burglary resistance in accordance with the European standard, EN 1143-1, as certified by ECB•S for Grade III. Meets the demands of all Insurance Companies when it comes to burglary resistance.
- Tested by an independent, ISO 17025 accredited laboratory according to the NT Fire 017 – 60 Paper standard with certification managed by ECB•S. Protects your vital documents from the effects of fire.
- All sizes can be trusted to protect their contents not just against unauthorised forced burglary attack but also against the extreme temperatures experienced during fire.
- Supplied with one key lock as standard with the option of a factory fitted electronic lock or optional two locks. This gives the flexibility to customise how DuoForce can be secured and operated
- DuoForce Grade III introduces a new small size, Model 40; ideally suited to Residential clients requiring the safe storage of jewellery and valuables or needing to comply with local legislation concerning gun storage. DuoForce can be installed almost anywhere
- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity

SENATOR

BURGLARY & FIRE-RESISTANT PROTECTION

EN 15659
LFS 30 P

EN 1143-1
Grade I

KEY FEATURES

- Dual Certification: Burglary (EN 1143-1) Grade I and Fire (EN 15659, LFS 30 P).
- Certified locks: EN 1300 certified Class A key lock or Class B high-security electronic lock.
- Four models available: 32, 46, 63 or 190 litres.
- Secure bolt work and traditional heavy weight design.
- Enhanced design: removable door for easy installation and a reduced overall weight by 15%.
- Fittings: each safe is supplied with one shelf as standard.
- Attractive appearance: single-colour door and body in dark grey (RAL 7016).
- Ideal for the home or office.

MODEL SHOWN: CONSUL M-15

CONSUL

BURGLARY-RESISTANT PROTECTION

EN 1143-1
Grade 0–I

KEY FEATURES

- Market leading light weight allows for easier installation.
- Burglary protection in accordance with EN 1143-1, as certified by ECB•S for Grade 0 and I.
- Composite door made from 10mm steel with an overall thickness of 35mm.
- The body is 45 mm overall, comprising the inner and outer steel walls, the space between which is filled with a multi-material burglary resistant barrier.
- 25mm diameter steel bolts secure the door, three operating horizontally and two each vertically upwards and downwards.
- Recessed door & concealed internal hinges which give a smooth finish & prevent areas of attack.
- Model 25 & above has the ability to store A4 Binders.
- Consul comes in two lock options:
  – Double-bitted 8 lever, EN 1300 Class A certified key lock to which two 90mm keys are supplied.
  – A user-programmable, EN 1300 Class B electronic lock capable of accepting two differing user codes and a time-delay function.
- The safe is prepared & anchoring kit is supplied to allow the Consul range to be securely base- or rear-fixed to resist unauthorised removal once installed.

MODEL SHOWN: DUOGUARD M-445

DUOGUARD

BURGLARY & FIRE-RESISTANT PROTECTION

EN 1047-1 S 60 P

EN 1143-1 Grade 0–I

KEY FEATURES

- Burglary protection in accordance with EN 1143-1, as certified by ECB•S for Grades 0 and I.
- Approved by ECB•S in accordance with EN 1047-1 in class S 60 P for one hour's fire protection of paper documents.
- Torch-resistant barrier material – Dualite – ensures burglary and fire protection whilst also reducing its total weight and minimising transportation and installation costs.
- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity.
- The three-way boltwork is made from solid steel bolts.
- A Class A mechanical key lock or a Class B high-security electronic lock, approved in accordance with EN 1300, are both available as primary lock options.
- Fitted with an active relocker and anti-drilling plates incorporated into the boltwork to withstand burglary attempts. (manganese-coated steel plates for Grade 0 and T200X carbide-clad steel plates for Grade I).

DUOGUARD GII

BURGLARY & FIRE-RESISTANT PROTECTION

NT Fire 017
90 paper

EN 1143-1
Grade II

KEY FEATURES

- Burglary protection in accordance with the European standard, EN 1143-1, as certified by ECB•S for Grade II.
- Approved by SP Technical Research Institute of Sweden in accordance with fire resistance class NT Fire 017 – 90 paper and SP's certification rules for fire resisting storage cabinets, SPCR 002.
- The three-way boltwork is made from solid steel bolts.
- Torch-resistant barrier material – Dualite – ensures burglary and fire protection whilst also reducing its total weight and minimising transportation and installation costs.
- Fitted with an active relocker and anti-drilling plates incorporated into the boltwork to withstand burglary attempts.
- A Class A mechanical key lock or a Class B high-security electronic lock, approved in accordance with EN 1300, are both available as primary lock options.
- Ergonomic soft-touch handle and a range of internal fittings to maximise storage capacity.

PROGUARD

BURGLARY-RESISTANT PROTECTION

EN 1143-1
Grade III

- Burglary protection in accordance with the European EN 1143-1 standard, as certified by ECB•S for Grade III.
- ProGuard's special barrier material provides certified burglary protection whilst also keeping the total weight of the safe down. Less weight means lower transportation costs and greater installation options.
- A higher level of protection can be offered in a safe with reduced wall thickness and increased interior capacity.
- The three-way boltwork is constructed with solid steel bolts.
- For additional security, ProGuard is fitted with an active relocker and anti-drilling plates have been incorporated into the boltwork to withstand burglary attempts.
- Either a mechanical key lock or a high-security electronic lock can be used as the primary lock option. At least one EN 1300 Grade B lock must be fitted as standard.
- Every model can be customised with a range of internal fittings to maximise storage capacity. NOTE: Brackets need to be ordered for each fitting
- ProGuard has a modern design with an ergonomic soft-touch handle.

CUSTODIAN

BURGLARY-RESISTANT PROTECTION

EN 1143-1
Grade IV–V

KEY FEATURES

- Well-designed to fit into an office environment, such as retail shop, bank branch or any small or medium office.
- Developed with convenience in mind, Custodian safes are practical and easy-to-use.
- Ergonomic handle, soft-touch handle.
- Sleek design with elegant RAL 7016 for the body colour and light RAL 7040 grey for the interior fittings.
- Leading-edge GRAVITON barrier material to ensure excellent burglary protection.
- Perfectly suited to add an additional high-layer security to protect your most valuable belongings, Custodian complies and is certified with the strictest requirements for quality and burglary resistance according to EN 1143-1 for Grades IV and V.
- Six models available – 111, 168, 210, 308, 416 and 596 litres.
- As a standard, Custodian is equipped with two security key locks that you can choose among a list of Class B locks approved in accordance with EN 1300. Electronic lock options increase the level of security and prevent unauthorised access to the safe.
- Convenient selection of interior fittings: shelf, suspension files and lockable drawer.

MODEL SHOWN: OMEGA DEPOSIT M-50

OMEGA DEPOSIT

BURGLARY-RESISTANT PROTECTION

KEY FEATURES

- Protects organisations from opportunist attacks.
- Ideal for retail outlets operating remotely from central areas and in multi-shift or out-of-hours environments where key holders are not always available.
- Securely holds cash without the need for the safes to be opened.
- Ensures that large quantities of money do not accumulate in the cash till.
- Door is made from 10mm steel.
- Body is made from 6mm steel.
- 20mm diameter steel bolts secure the door.
- Door bolts operate in three directions.
- An anti-fishing device prevents deposits from being removed once deposited into the deposit chute.
- Shelf supplied with model 50.
- Omega Deposit comes with three lock options:
  – Double-bitted 8-lever key lock.
  – A programmable multi-user electronic lock with optional dual control.
  – Electronic lock complete with a double bitted, emergency override key.
- An anchoring kit is supplied so the safe can be securely base- or rear-fixed, preventing unauthorised removal once installed.

RHINO MK II DT

BURGLARY & FIRE-RESISTANT PROTECTION

KEY FEATURES

- Designed for retail and commercial use.
- 65mm barrier thickness made of a high-density monolithic casting contained within inner and outer steel casings.
- Solid composite 35mm thick main door is combined with additional protection plates to protect crucial locking areas. Solid steel 28.5 mm diameter moving bolts attach the door to the body, while fixed "anti-heeling" bolts on the door's rear edge protect the hinge side.
- Deposit drawer with solid 10mm steel plate front combined with an internal anti-fishing mechanism to secure all items deposited.
- Main door secured by EN 1300 Class A primary locks which can be single lock, be it a key lock, manual combination or electronic lock depending upon individual requirements. For additional security, a second lock is possible.
- Drawer deposit unit secured by a single EN 1300-certified Class A lock.
- Two security fixing bolts to ensure it can be firmly fixed to the floor when installed.

MODEL SHOWN: PROGUARD DT M-45

PROGUARD DT

BURGLARY-RESISTANT PROTECTION

EN 1143-2
Grade DI–DII

KEY FEATURES

- Certified, tested and approved in accordance with the European EN 1143-2 standard, in Grades DI and DII.
- EN 1143-2 certified meaning that insurance ratings are not affected by the additional deposit function.
- Built using the same technology as the ProGuard, which is certified in accordance with the European EN 1143-1 standard for Grade II.
- Constructed using a new composite material designed for strength and reduction in total weight, keeping transportation and installation costs to a minimum.
- Solid steel three-way boltwork.
- Anti-fishing device to prevent anyone reaching the contents through the drawer.
- Fitted with an active relocker and anti-drilling plates incorporated into the boltwork to resist burglary attempts.
- A Class A mechanical key lock or a Class B electronic lock, approved in accordance with EN 1300, available as primary lock options. Electronic locks increase the level of security and prevent unauthorised access.
- Drawer trap fitted with a Class A key lock.

DATAPLUS

FIRE-RESISTANT DATA MEDIA PROTECTION

EN 1047-1 S 120 DIS

UL 72 Class 125

EN 14450 S2

KEY FEATURES

- Easy slam action emergency closing in event of a fire.
- Generous capacity.
- High-quality media protection.
- Two-hour data media protection label. Tested to the highest international standards, UL 72 and EN 1047-1. DataPlus is certified as Class 125 2hrs with drop test by UL. EN Norm is certified by ECB•S in class S 120 DIS for fire resistance.
- Burglary protection in accordance with European norm EN 14450 and certified by ECB•S in security class S2.
- Easy to transport and install.
- Low weight ratio due to new advanced fire protection barrier material.
- Ability to customise by using internal fittings to optimise your storage capacity.
- Ability to base fix to the floor for effective prevention of physical removal.
- Removable front plate allows useage of a pallet loader for more efficient installation, reducing costs to the customer.
- The cabinet is fitted with a key lock as standard. However, you may require the monitoring of access to your sensitive data and therefore we have a series of electronic locks ranging from basic locking to more sophisticated audit trails.
- The cabinet is an attractive light grey which fits in well in most office interiors.

MODEL SHOWN: BINDER FIRE FILE M-160

BINDER FIRE FILE

UL 72
Class 350 2h

FIRE-RESISTANT DOCUMENT PROTECTION

KEY FEATURES

- Certified UL Class 350 Endurance protection by UL for up to two hours.
- Maximised storage capacity that allows users to gain full advantage for their storage requirements. Available with 3 or 4 drawers and each drawer holds up to 40 A4 DIN 33mm binders, hence 120 and 160 binders in the three drawer and four drawer versions respectively. By comparison, a standard free standing cabinet with five levels of storage each of 1m length can only hold 150 such binders. Thus the Chubbsafes Binder Fire Files are the perfect storage solution for the congested offices.
- Insulation between drawers means each drawer's contents are protected in an event of fire if one drawer is left open.
- Easy operable day catch to secure the drawers when closed. Units do not have to be locked to provide fire protection but just be pushed closed.
- High-quality steel sliders to ensure comfortable operation and full drawer access.
- Low-weight cabinets for reduced transportation and installation costs, and lighter floor loads.
- All models fitted with high-security locks as standard.

MODEL SHOWN: ULTRA FIRE FILE 31" M-270

ULTRA FIRE FILE 31"

UL 72
Class 350

FIRE-RESISTANT DOCUMENT PROTECTION

KEY FEATURES

- Certified in accordance with UL Standard 72 in Class 350 Endurance and Impact for both 1 hour and 2 hour duration.
- A shock absorbing plinth provides maximum impact absorption in the event of a floor collapse in a building fire.
- In two-hour certified models, each drawer is individually protected from fire. Even if one of the drawers is accidentally left open, the other closed drawers are still protected.
- Maximised capacity for optimized storage.
- Extended drawers give full access.
- It is available in two-, three- or four-drawer versions.
- Easy-to-operate day catch to secure the drawers when closed.
- Units do not have to be locked to provide fire protection but just to be pushed closed.
- Lighter weight construction, means easier transportation and installation.
- Fitted with high-security locks as standard.
- Light Grey RAL 7035, powder-coated finish and modern design which blends nicely into any office environment.
- Manufactured in accordance with ISO 9001 for quality management systems and ISO 14001 for environmental management systems.

AIR

BURGLARY PROTECTION FOR YOUR VALUABLES

KEY FEATURES

- Compact safe for the home, hotel room or office.
- Three models available: 9-, 16- and 24-litres capacities. The largest is designed to accommodate most laptop computers.
- Choice of locking options: available with a double-bitted key lock or an electronic lock with a programmable code.
- Emergency key override facility for the electronic lock should battery power ever fail.
- Patented “anti-bump” technology which affords the electronic lock protection against impact attacks.
- Tamper-evident keypad.
- Ready for base and for rear fixing, supplied with four expansion anchors.
- Inner base carpet.
- Key hooks included on all electronic models.

PRODUCT SPECIFICATIONS

Model	External Height (mm)	External Width (mm)	External Depth* (mm)	Internal Height (mm)	Internal Width (mm)	Internal Depth (mm)	Capacity (litres)	Net Weight (kg)	No. of Shelves

* In electronic models, add 20mm to allow for keypad projection.

MODEL SHOWN: ALPHAPLUS M-65

ALPHAPLUS

BURGLARY-RESISTANT PROTECTION

KEY FEATURES

- Double-skinned safe for securing cash, jewellery and valuables around the home or at the office.
- Filled with a fire-retardant mineral wool.
- Can be easily installed in the home without specialised tools.
- Four models available ranging from just 3- to 64-litre capacity.
- Choice of locking options: available with a double-bitted key lock or a touch-screen electronic lock with programmable code.
- Audible anti-tamper alarm installed on all electronic locking models.
- Internal LED lighting on all electronic locking models.
- Electronic models all feature motorised open/closing.
- External emergency power connection should battery power fail.
- Emergency key override facility in the unlikely event of total electronic failure.
- Tamper-evident keypad.
- Ready for base and or rear fixing, supplied with four expansion anchors.
- Inner base carpet.

MODEL SHOWN: HOMESAFE S2 30P M-50

HOMESAFE S2 30P

BURGLARY & FIRE-RESISTANT PROTECTION

EN 14450 S2

EN 15659 LFS 30 P

KEY FEATURES

- Combined fire and burglary protection in one safe.
- EN 14450 certified by ECB•S to level S2 burglary protection.
- EN 15659 certified by ECB•S for 30-minutes' fire protection for documents.
- Choice of 6 models: from 11- to 91-litre capacity.
- Choice of locking options in all models: EN 1300 certified double-bitted key lock or EN 1300 certified electronic lock.
- Dual base fixing holes, supplied with two concrete anchor bolts.
- Ideal safe for protecting cash and valuable items, as well as passports, title deeds and other important documents in the home and office.
- The safe door is secured using the new revolutionary “V” bolt system. The design of the locking bolts helps maintain door integrity both when under physical attack and during a fire.
- The safe is prepared & anchoring kit is supplied to allow the HomeSafe S2 30P range to be securely base- or rear-fixed to resist unauthorised removal once installed.

PRODUCT SPECFICATIONS

Model	External Height (mm)	External Width (mm)	External Depth (mm)	Internal Height (mm)	Internal Width (mm)	Internal Depth (mm)	Capacity (litres)	Net Weight (kg)	No. of Shelves
M-10	300	360	300	210	270	191	11	24	1

Hinges project 20mm beyond the depth given above. In standard electronic models, the overall projection increases to 30mm.

MODEL SHOWN: RHINO MK II M-180

RHINO MK II

BURGLARY & FIRE-RESISTANT PROTECTION

EN 15659 LFS 60 P

EN 14450 S2

KEY FEATURES

- Body barrier thickness of 65mm; constructed from steel, welded throughout and filled with specially formulated Chubbsafes barrier material.
- A solid composite 35mm thick door is combined with additional protection plates for crucial locking areas.
- Solid steel moving bolts with a 28.5mm diameter affix the door to the body, while fixed “anti-heeling” bolts on both front and rear edges protect the door from prying attack.
- A Polyurethane base paint finish is used to coat the body and door. The paint is both scratch resistant and durable.
- Tested in accordance with EN 14450 Level S2, certified by ECB•S.
- Rhino Mk II has been tested in accordance with EN 15659, and is certified to level LFS 60 P by ECB•S giving 1 hour fire protection.

CENTURION SR

BURGLARY & EXPLOSION-RESISTANT STRONG ROOMS

EN 1143-1 Gr. IX–XII EX

EN 1143-1 Gr. V–XII

KEY FEATURES

- Centurion vaults are available in grades V–XII. All grades have been approved to provide resistance against explosives and grades IX–XII offer additional protection against diamond crown drill bits.
- Every grade of Centurion vault has been independently tested by ECB•S and awarded the EN 1143-1 certification for burglary resistance.
- The vault rooms are constructed using lightweight modular panels, making assembly, disassembly and expansion of a room both quick and easy.
- Reduced wall thickness maximises use of the available space.
- An innovative, VdS-approved ventilation system provides optimum climate control.
- Every panel is fitted with an upper and lower cable duct.
- A range of reinforcement structures can be built into the vault room panels to offer additional protection against mechanical and thermal tools.
- The exterior of the vault can be finished with plaster or clad with wood or metal panels.

PRODUCT SPECIFICATIONS

	Thickness (mm)	Weight kg/m²

Grade XII (CD, EX)	280	830

CD: denotes protection against diamond core drill bits.

CENTURION VD

BURGLARY-RESISTANT VAULT DOORS

EN 1143-1 Grade V–XIII

EN 1143-1 Grade V–XIII

KEY FEATURES

- Certified protection against burglary (certified by ECB•S) for Grades V to XIII.
- Models from Grade VIII to XIII provide resistance against powerful diamond-core drill bits (certified by CD classification).
- Explosives protection (EX) is available upon request from Grades V to XIII.
- Door frames are armoured to provide extra protection.
- The doors are designed to accommodate an alarm system.
- A new design that is thinner and lighter.
- A stainless steel door frame for a stylish construction.
- Developed to accommodate an alarm system.
- Colour finish in RAL 7016 Antracite Grey or RAL 7035 Light Grey as a standard.
- Ergonomic for user friendly operation.
- Optional grill gate (accessible via a high security lock that can be opened manually or automatically) available.

CENTURION LW-SR

BURGLARY-RESISTANT LIGHTWEIGHT STRONG ROOMS

EN 1143-1
Grade V

KEY FEATURES

- Panels are certified as Grade V by the European Certification Board Security Systems (ECB·S), in accordance with the EN 1143-1 standard.
- Next to the steel reinforcements, the panels contain a newly developed high-strength concrete and wood pieces that allow for a lighter weight and environmentally friendly approach (no use of bitumen or any toxic components).
- Specifically designed to address strong room projects for which a lower floor loading restriction is imposed – such as upstairs or in an historic building, and where standard vaults cannot be installed.
- The very lightweight modular strong room panels reduce transportation costs and facilitate an easy and quick assembly.
- Reduced wall thickness to maximise available space.
- Innovative, ECB·S-certified ventilation system for optimum climate control.
- Optional planar protection.
- Interior finished with primed surface; exterior finished with steel.

PRODUCT SPECIFICATIONS

	Thickness (mm)	Weight kg/m²
Grade V	80	175

CENTURION LW-VD

Gr. V–VI

BURGLARY-RESISTANT LIGHTWEIGHT VAULT DOORS

KEY FEATURES

- Doors are certified as Grade V and VI by ECB·S, in accordance with the EN 1143-1 standard.
- A new design that offers an exceptional lightweight performance without compromising on burglary resistance.
- The very lightweight door reduces transportation costs and facilitates assembly.
- Seven and thirteen active front bolts (30 x 30 mm) and two relockers.
- Door frames are armoured to provide extra protection.
- The doors are designed to accommodate an alarm system.
- Ergonomic design to optimise simplicity and accessibility for a solution that is user-friendly and easy to operate.
- Optional grill gate available, accessible via a high-security lock that can be opened manually or automatically.
- Door also available as “Door-in-Door” variant with an integrated emergency door, certified as Grade V–VI.
- The Centurion lightweight vault door is the ideal complement to the lightweight Grade V strong room.

MODULEGUARD VD

EN 1143-1
Grade II–IV

BURGLARY-RESISTANT VAULT DOOR

KEY FEATURES

- ModuleGuard security enclosures are certified Grade II–IV by ECB•S in accordance with the EN 1143-1 certification for burglary resistance.
- A range of attack tools were used to test the level of resistance, from basic tools, such as drills and sledgehammers, to more sophisticated thermal and electrical equipment, like the oxyacetylene torch.
- Possible application areas: reinforced protection for cash-counting rooms, archives, storerooms (for weapons, pharmaceuticals), ATMs, etc.
- A series of high-security locking options is available.
- The exterior of the enclosure can be painted or finished with decorative panels. Prepainted or galvanised versions available as an option.

MODULEGUARD SR

EN 1143-1
Grade II–IV

BURGLARY-RESISTANT STRONG ROOMS

KEY FEATURES

- ModuleGuard security enclosures are certified Grade II–IV by ECB•S in accordance with the EN 1143-1 certification for burglary resistance.
- The security enclosures are constructed using modular, lightweight panels.
- The light weight reduces transportation costs, eases installation and allows for placement higher up in buildings where floor loads are limited.
- The modular construction means assembly, disassembly and expansion of a room are both quick and easy.
- The security enclosures can be built into the existing structure of a building and customised to meet the required dimensions.
- Possible applications are: reinforced protection for cash-counting rooms, archives, storerooms (for weapons, pharmaceuticals), ATMs, etc.
- A series of high-security locking options is available.
- The exterior of the enclosure is primed in RAL 7032 and can be finished with decorative panels.
